

## Press Release

China Helicopter Expo 2017

### **CMIG Leasing further enhances cooperation with Airbus Helicopters in China**

The two companies to strengthen civil helicopter general operations and expand to the public services segment in China

**Tianjin, China, 14 September 2017** – CMIG Leasing (previously known as CMIFL) and Airbus Helicopters further strengthened their partnership through an agreement signed during China Helicopter Exposition 2017 by TANG Min, President of CMIG Leasing, and Marie-Agnes Veve, General Manager of Airbus Helicopters China.

Upon the agreement, the two parties will further deepen their cooperation in civil helicopter operations including navigational operation and low-altitude air tourism. In addition, both parties are committed to expanding this cooperation to the public services segment, including police aviation, emergency medical services (EMS), and forest firefighting. To accomplish such objectives, CMIG Leasing also signed a letter of intent for up to two pre-owned H225 helicopters to be used in firefighting missions, further demonstrating the performance and versatility of this variant of the Super Puma family.

CMIG Leasing is following the terms and conditions of the existing framework agreement announced at China Helicopter Exposition in 2015, which covers a total of 100 Ecureuil family helicopters. To date, 20 Ecureuil helicopters from this agreement have already been delivered.

“We’re delighted to further strengthen our strategic partnership and extend the cooperation with CMIG Leasing for the civil helicopter industry in China,” said Marie-Agnes Veve, General Manager of Airbus Helicopters China. “Airbus Helicopters has been present in China for 50 years, as the first Alouette III helicopter entered into the country in 1967. We are committed to the continued development of China’s helicopters industry and by working with such great partners, we can all achieve more success together.”

CMIG Leasing is one of the most influential helicopter leasing companies in China, as well as a strategic partner of Airbus Helicopters. At the last China Airshow in 2016, CMIG Leasing signed a LOI for the new generation, twin-engine H160 helicopter, making them the launch customer in China and strengthening their commitment to China’s general aviation industry by fulfilling diversified market demands.

Airbus Helicopters is the world’s leading helicopter manufacture and is the leader as well in China’s civil helicopter market with a 40% market share. Today, more than 260 Airbus helicopters are flying across the country.

## Press Release

### About Airbus

Airbus is a global leader in aeronautics, space and related services. In 2016, it generated revenues of €67 billion and employed a workforce of around 134,000. Airbus offers the most comprehensive range of passenger airliners from 100 to more than 600 seats. Airbus is also a European leader providing tanker, combat, transport and mission aircraft, as well as Europe's number one space enterprise and the world's second largest space business. In helicopters, Airbus provides the most efficient civil and military rotorcraft solutions worldwide.
