

# H145M

## The new "turnkey solution" designed for the most demanding operations

The H145M is an economical and versatile military helicopter covering the entire spectrum of military missions, from light utility to light attack.

In service as the U.S. Army's Light Utility Helicopter, the **UH-72A Lakota** version has demonstrated an availability rate of greater than **90%**

### Special ops, air assault, C4I

Special operations teams can quickly access the aircraft thanks to its spacious cabin which has two, large sliding side doors and double clamshell doors at the rear.

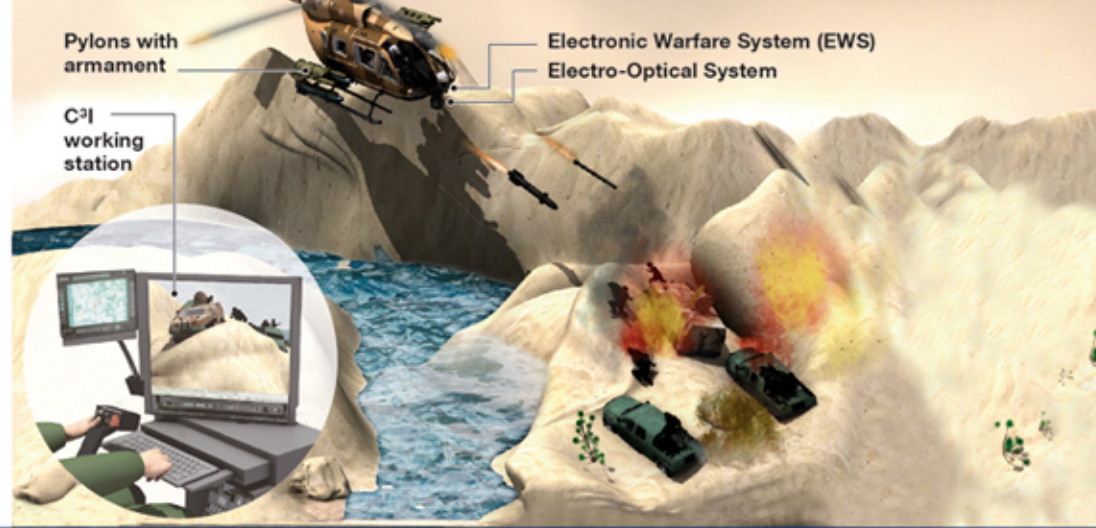

### Armed scout / light attack

Equipped with an incremental modular weapon system, the H145M can handle all types of operational scenarios, from conventional to asymmetric conflicts.

Exhaustive & Flexible: a deterrent and affordable weapon system

### Tech Data

Capacity	Engine	Fast cruise speed	Max. range
1-2 pilots + up to 10 troops	2 Turbomeca ARRIEL 2E turboshaft Dual channel FADEC	240 km/h - 129 kts	638km - 345 NM

### Personal recovery, CASEVAC, MEDEVAC

The large unobstructed cabin provides great modularity, and its layout can be quickly converted to meet changing requirements with twin rails on the flat floor.
